Fund Strategy

Established in July 2016, the Australian Eagle Trust Long-Short Fund aims to achieve strong double digit returns by allowing clients to access Australian Eagle's demonstrated historical strength in constructing Australian share portfolios applied to a long-short product. Modelling a combination of Australian Eagle's actual long investment performance since 2005 in conjunction with a short selling discipline, suggests that this product can provide strong investment returns along with an alpha performance that is negatively correlated to the broader Australian equity market. Australian Eagle's investment process seeks to deliver significant outperformance by identifying mispriced stocks with changing growth profiles and building concentrated portfolios of those stocks.
